

# WynLens

Visualization, Analysis and Modelling of a Holographic City

Dr Adam Mowlam  
Manager Smart City Office

Located in Melbourne, Australia

Rapidly growing and diverse population

One part of our smart city journey

Imagine a future where governments collaborate with informed communities to solve city problems

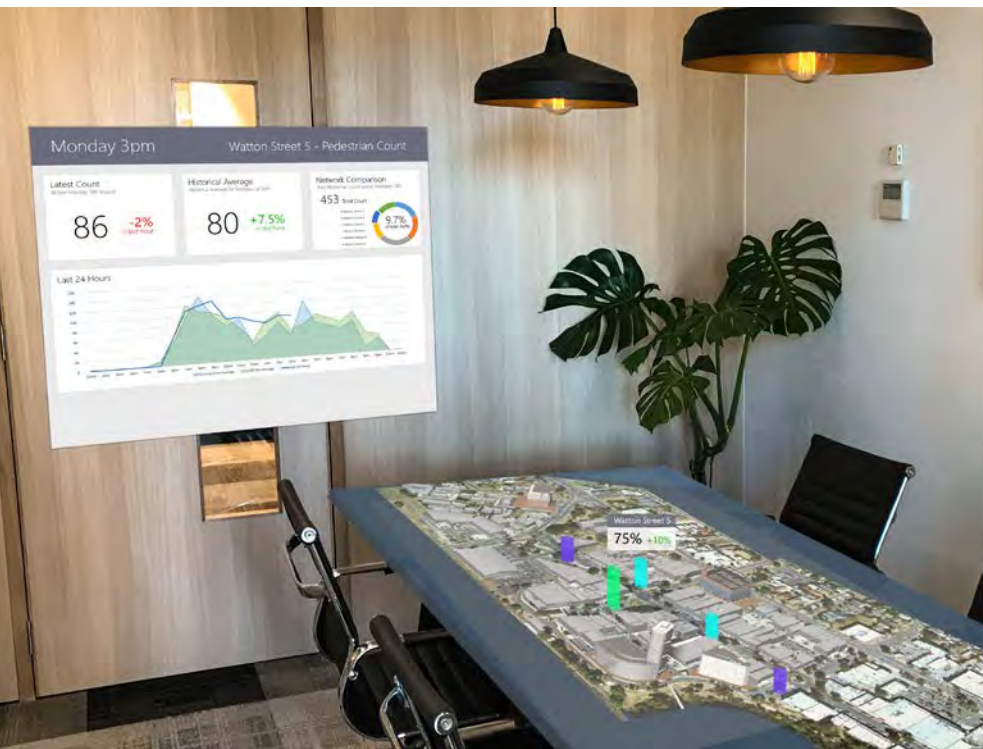

Wyndham City saw an opportunity to transform how we present and use city data

A 3D vision of our future city and a revolutionary  
decision making tool

A visualisation of sensor based data such as pedestrian counters

Converting city data into Information and intelligence

immerse

explore

collaborate

The possibilities are endless.

## Learnings & Limitations from 400 immersive sessions

Our work in the holographic space has only just begun

Thank You
