

Low-risk and moderate-risk gambling: the facts

8.91% or 391,188 of Victorian adults are low-risk gamblers – they would fill the Melbourne Cricket Ground nearly 4 times.

Low-risk gambling increased 56% from 2008 to 2014

Harm from gambling in Victoria is comprised of:

Although harm from problem gambling is the most severe, harm from low-risk and moderate-risk gambling causes a greater burden on the community because the number of people affected is much greater.
