Survive the Heat

There are things we can do to stay safe in extreme heat

- drinking at least two litres of water a day
- seeking out air-conditioned buildings
- drawing your blinds to keep the heat out
- taking cool showers

We can also keep an eye on people we know who may be at greater risk of heat exhaustion like our neighbours who live alone, young children, or people with a medical condition. Please be aware that the amount of days above 35 will keep increasing.
