

SOLAR SAVERS FACTSHEET

What is Solar Savers?

Solar Savers is a local government initiative making solar easy. Solar Savers helps residents install quality, affordable solar to cut energy bills and future proof your household against increasing energy costs. Solar Savers takes the hard work out of solar by choosing a trusted installer with quality solar systems and workmanship for you.

How it works

Solar Savers:

- Checks that solar is right for your household.
- Arrange for a trusted installer to contact you and prepare a quote.
- Should you choose to proceed, you simply approve the provided quote, sign the agreement and pay a 10% deposit.
- The installer will then guide you through the process from the very beginning until after the unit is installed and you are happy with your new Solar PV system.

Who is eligible?

You're eligible to apply for Solar Savers if you:

- Own your home.
- Have average to high electricity use (contact Solar Savers if you're unsure).
- Do not currently have solar panels on your home.

Pension Card Holders

If you hold a Pension Card, you may be able to access a low-interest loan from Bank Australia, allowing you to pay off your Solar PV system over 10 years. Bank Australia is a 100% customer-owned bank that is committed to responsible lending.

What next?

Registrations for Wyndham open January 2020.

To register your interest head to www.solarsavers.org.au or contact Solar Savers on 1300 548 598
