

## Planter Box Update

Hello again, its so great to hear how well used the planter boxes are and how much enjoyment they are providing. Check out what your fellow growers have been up to.

### Chris

My kids and I are enjoying this planter box and I use this planter box as an opportunity to tell them how to grow vegetables and different plants.

Some neighbours' children also came around and checked different type of herbs and brought some back to share with their family.

This is a wonderful program and has given us a chance to talk to our neighbourhood.

Dee

Some of our fresh vegetables:

- \* Lettuce
- \* Rocket
- \* Tomatoes

Dee's tip - We picked our tomatoes earlier, while still green and put them in a brown paper bag. This process will add approximately 1 week to the tomatoes' life.

Our veggies taste amazing 😊

We absolutely love our planter boxes. My daughter wants to check them and water them every day! We have had all neighbours ask about them too which is a great convo starter.

We have pulled out our first harvest of bok choy and beetroot and we are amazed at how quickly they have grown.

We think this is a great initiative and glad we put our names down for it.

Happy planting everyone!!
