

Jigsaw Puzzle!

Love jigsaw puzzles? You can make your own! On the next page is a blank puzzle template. Print out and draw your picture or design, then colour in and cut out. To make the paper stronger, you can stick the puzzle onto cardboard, like a flat cereal or tissue box.

Don't have a printer? No problem! Grab paper, a ruler and drawing supplies and copy the template on the next page. Or make up your own!

Another way to design your own puzzle is to draw a large square or rectangle on paper, and draw your picture. Then draw a grid inside through the picture. When you cut this out it will be challenging to put the puzzle back together because all the edges are straight. The more lines you draw the harder the puzzle will be.
