

Make your own building blocks.

You can make your own building blocks using paper cubes. Either print out the template on the next page or draw your own. If you want to make your own blocks, try drawing it out on paper with a ruler. Make sure each square is the same size. For example 5cmx5cm. Fold along the lines and glue or sticky tape the block together. See if you can make the blocks bigger or smaller.

Building ideas:

- You can draw windows and doors on the blocks so you can build houses.
- Draw a different pattern on each side of the block.
- Use three blocks to draw an animal. If you draw the head on one block, the body on the second block and legs on the third block you can make funny looking animals by turning your blocks around. Draw a different animal on each side of the block.
