

Make your own city map.

You can make your own city or town map using items around the house.
You will need:

- paper
- drawing supplies
- your imagination!

Ideas:

- Draw out roads on your paper. If you have toy cars make the roads big enough so the cars can go for a drive.
- You can draw buildings and houses on your city map. Use the Make your own Building Blocks activity sheet to make 3D houses.
- Stick pieces of paper together to make the map larger.
- Add in trees and parks so your city has some nature.
- If you have Lego or blocks around you can use them to add buildings to your map.
- What else can you find around the house to build your city?
