

Superhero Shield.

If you were a superhero (or a supervillain) what would your shield look like? To design your own shield draw a shield shape on paper, or use a paper plate. To make a handle cut a strip of cardboard (you can use an old cereal box) and stick the two ends to the back of the shield. Or you can fold a strip of paper a few times to make it strong like I did here. Colour in and decorate. There are some shield shapes on the pages below to get you started.
