

Build a Paper City.

You will need:

- paper
- drawing supplies
- scissors
- sticky tape

What to do:

1. Draw and colour some buildings on paper and cut them out. Leave space at the bottom of the building when you cut. This will be a tab that you stick down so the building stands up.
2. Sticky tape two pieces of paper together. This will be the background of your city. I coloured in some sky, grass, a footpath and a road.
3. Fold back the tab on each building and use tape to stick them onto your city background.

You will fold this white tab behind the building and tape it down on the the paper.
