

# DOCTOR WHO

## DESIGN YOUR OWN TARDIS!

TARDIS stands for Time and Relative Dimension in Space. A TARDIS is a time machine that can travel back and forward in time, plus travel through space. The TARDIS has a chameleon circuit which allows it to blend in with its surrounds, but The Doctor's is broken so it always looks like a British police phone box. The TARDIS is a lot bigger on the inside! Even The Doctor does not know how many rooms there are. The Doctor's TARDIS has a library, swimming pool, squash court and a greenhouse.

If you had a TARDIS, what would it look like on the outside and what rooms would be on the inside? Plan out and draw your TARDIS. Remember your TARDIS has to blend in with the surrounds when you travel!

**Don't forget to share your creation with the Kids Club Online Gallery.**

# SANDRA'S TARDIS

My TARDIS looks like a tree. If I travel back in time, into the future or to another planet hopefully my tree blends in with the surrounding and no one will know it is a time machine.
