

Food Jigsaw Puzzle!

What to do:

1. Print off the jigsaw puzzle template on the next page. If you do not have a printer draw your own jigsaw puzzle on paper. Cardboard works best, but if you do not have cardboard then stick two pieces of paper together to make the puzzle pieces stronger.
2. Draw your food designs on the puzzle before you cut it out. You could draw a big image of your favourite food so it takes up the whole page, or draw different types of food.
3. When you have finished drawing and colouring your food, cut out the jigsaw puzzles pieces and see if someone else can put it back together.
4. Take a photo when you are finished and upload to the [Kids Online Photo Gallery](#).
