

Magic Rainbow Water Experiment!

Watch as the rainbow magically moves from the paper towel into the water.

What you need:

- Paper Towel
- Textas (not permanent marker)
- Tray
- Water

What to do:

1. Colour in a rainbow on the bottom quarter of a square of paper towel. Colour carefully, paper towel rips easily.
2. Fill a tray or dish with enough water to cover the bottom.
3. Carefully place the very bottom of the paper towel in the water.
4. Now watch as the colours move from the paper towel into the water! Wait five minutes and see what the water looks like.
5. Leave your paper towel to dry overnight. What happened to the rainbow?
