

Magic Star Wand

Let's make a magic star wand!

What you need:

- 2 sheets of paper
- Colouring supplies
- Wool, string or ribbons
- Glitter or sequins
- Scissors
- Sticky tape

What to do:

1. Colour in one sheet of paper. This will be your wand. You don't need to colour the whole sheet of paper because you will be rolling it up.
2. Draw a star or another shape for the top of your wand. Colour in both sides of the star. If you want it to be stronger, stick two stars together.
3. Roll the wand up and secure with sticky tape.
4. Cut up strips of wool, string or ribbons. I tied my wool together in a knot at the end and pushed it inside one of the ends of the wand.
5. Use sticky tape to stick the star on the end of the wand with the wool. Decorate your wand with glitter and sequins.
6. Now give your magic wand a wave! Take a photo and upload to the [Kids Club Online Gallery](#).
