

Make a Magician's Wand!

It's magic week in Kids Club Online! We have some magical experiments for you to do, so you need a magic wand for when you put on a magic show!

What you need:

- Black and white paper
- Scissors
- Sticky tape

What to do:

1. Roll up your black paper and secure with sticky tape along the edge so it stays together. If you don't have black paper, colour paper in black, or make your wand whatever colour you want!
2. Cut two strips of white paper like in the picture. Use tape to stick them to both ends of the wand.
3. Your wand is finished! Upload a photo to the [Kids Club Online Gallery!](#)
