

Nature's Christmas Decorations

Next time you go for a walk in the park, have a look around in the leaf litter on the ground.

Depending on the types of trees you have in your park, you might find some gumnut, pine cone, banksia or eucalypt seed pods.

These can make great Christmas decorations.

Making your own decorations from nature can be lots of fun and a great creative project. You can paint them, cover them in glitter, tie them up with ribbons or leave them in their natural state.

You may have some great flowers in your garden. They can be combined with Christmas baubles to make colourful decorations too.

Check out the following pages for some inspiration.

You might like to share your creations to the [Kids Club Online Gallery](#).

You might even use a fallen tree branch as a Christmas tree or use twigs to make your own tree. Never pull a branch off a tree to make a decoration. Ask your grown up for help.

*This branch came from a tree in my garden. It was cut off the tree during Winter. I've been saving it to be my Christmas tree ever since then.
