

# Paper Wind Spinner

To make a paper wind spinner you will need:

- Paper
- Colouring supplies
- String
- Scissors

## What to do:

1. Draw a circle on your paper. Make it as big as you can. Then draw a spiral inside the circle like the picture.
2. Colour in the spiral on both sides of the paper.
3. Cut out the circle then carefully cut out the spiral along the black lines you drew. You should have one long spiral that folds back into a circle shape when you lay it down.
4. Punch a hole in the end and tie some string through. Hang the wind spinner up somewhere outside.
5. Take a photo and upload to the [Kids Holiday Activities Gallery](#).
