

3D GIRAFFE

What you need:

- Two pieces of paper
- Colouring supplies
- Scissors
- Glue or tape

What to do:

1. Draw your giraffe on one piece of paper. I drew two long rectangle shapes for the necks and two heads. Colour everything in and cut out.
2. On the other piece of paper, draw a background.
3. Accordion fold the necks so they are not flat anymore. Stick the first folds onto the background paper. Then stick on the giraffe's head.
4. Done! Take a photo of your finished work and upload to the [Kids Club Online Gallery!](#)
5. What other animals have long necks like a giraffe? Can you make some more 3D animals?
