

Ox Paper Cutout.

In this activity we are going to try paper cutting.

You will need:

- Paper
- Pencil
- Stanley knife
- Cutting pad

What to do:

1. Draw a picture of an ox on the paper. You can look up 'how to draw an ox' online like I did to help you get started. I used a pencil to draw then went over it in black texta.
2. Using the pencil, draw patterns on the ox that you will cut out. Then very carefully use the stanley knife to cut out the patterns. You may need an adult's help with this. Make sure you have a cutting pad or something similar under the paper so you do not damage your work surface. You can also use scissors if you do not have a stanley knife.
3. I trimmed the sides of the red paper and then placed it onto back paper to finish.
4. Take a photo and upload to the [Kids Club Online Gallery!](#)
