

Design your own board game!

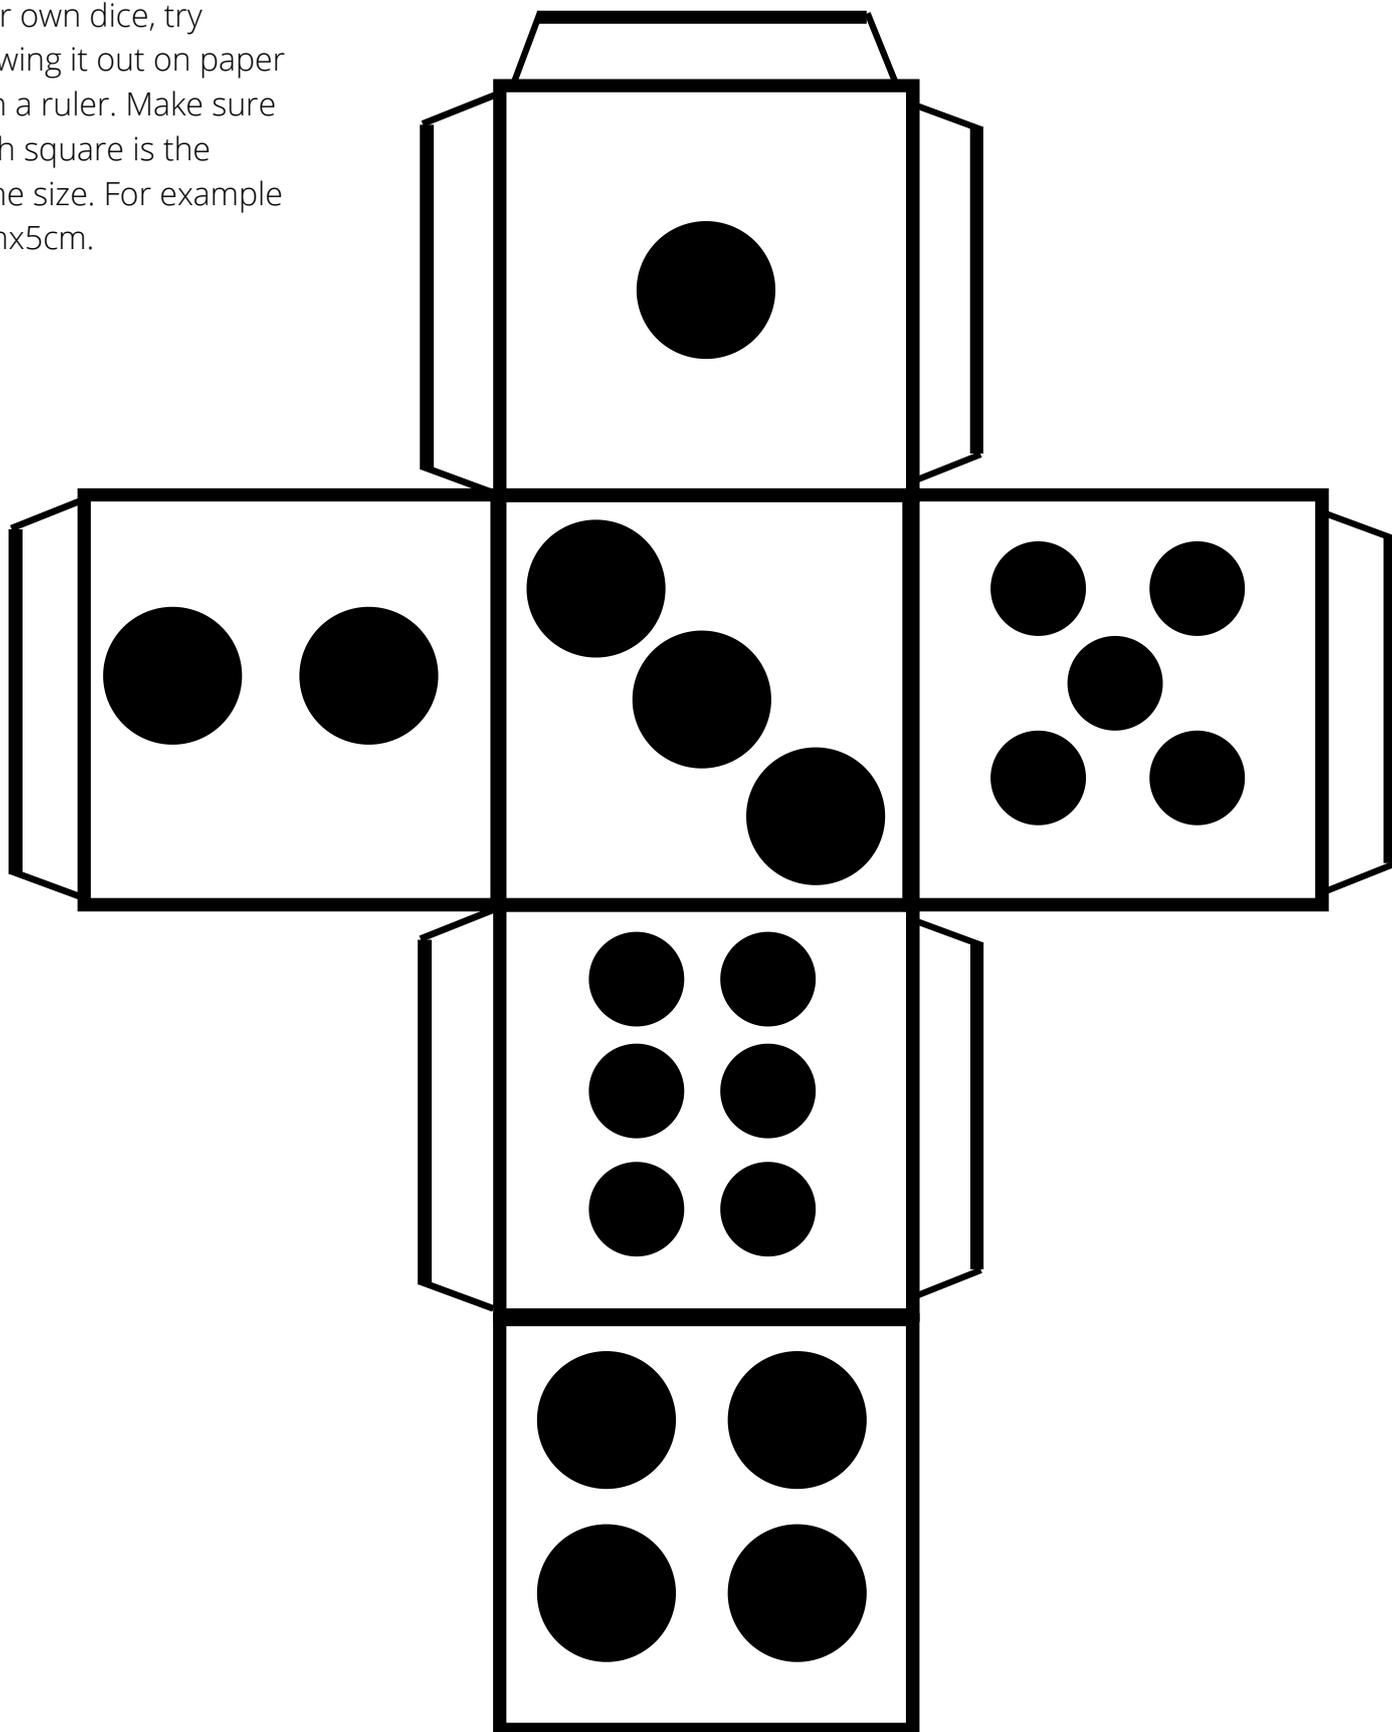

On the next page is a board game for you to print out and play! If you don't have a printer you can make your own. Here is how:

1. Grab some paper and drawing materials.
2. Draw out your board game on the paper. You can make it look like mine or different.
3. Colour in each square. I repeated blue, yellow, red and green.
4. Add the START and FINISH.
5. Now for the fun bit! Make up actions for some of the squares. I have both good and bad actions. The good actions let you move forward. The bad actions either send you back or skip a turn.
6. What good and bad actions can you come up with?
7. For another challenge you can also make cards. The cards can be used if you land on a certain colour. Cards can have actions like;
 - a. swap places with another player
 - b. skip a turn
 - c. go back however many spaces you rolled on the dice
 - d. have a double turn
 - e. double the number on the dice and go forward
 - f. the cards could also have questions that the player has to get correct to move forward. The questions could be a math problem, like what is 5×7 ? If the player gets it wrong they skip a turn or move backwards.
 - g. what other actions can you come up with?
8. Make a dice and counters for players and have fun!
9. Take a photo and show us your board game on the [Kids Club Online Gallery](#).

If you want to make your own dice, try drawing it out on paper with a ruler. Make sure each square is the same size. For example 5cmx5cm.

Colour and cut out the counters for each player.
