

Nature Collage

We are only going to use objects found in the garden for this collage. Let's go outside and have some fun!

What to do:

1. Grab a container or something to hold your collected objects in.
2. Go outside and collect some objects to make a collage. You can use strong glue (like PVA or craft glue) to stick your found objects onto cardboard. Or you can lay everything out on the ground and take a photo. You can see here I made a scene with Spiderman going for a swim in the forest! Show us your collage on the [Kids Club Online Gallery!](#)
3. Can you name everything you used in your collage? If you are not sure what the plant is, type a description of the plant into a search engine and do some research.
