

Cardboard Roll Plane

Paper rolls (from toilet paper and paper towel) are great to use in craft. Make sure you save them and add to your [Recycled Junk Craft Box](#).

What you need:

- Paper roll
- Paper
- Colouring supplies
- Scissors
- Sticky tape

What to do:

1. Colour in your roll. I painted mine.
2. On the paper you can draw and colour in shapes to make the wings, propeller and the fin shapes for the tail. Cut them out.
3. Roll up 4 small bits of paper around a pencil and use sticky tape to hold it together. Slide off the pencil. These will be to join the wings.
4. Stick everything together to make your plane. I used tape because it is stronger than glue.
5. Take a photo for the [Kids Club Online Gallery](#)!
