

Moon phases

Ramadan begins and ends with the new moon. For this activity, go outside a few nights a week and have a look at the moon. What does it look like? Draw the shape of the moon and write down the date. After 4 weeks, you can see the cycle the moon goes through. The new moon begins on Monday 12 April.

If you would like to read about Ramadan, click on [this link](#) or visit our Kids eLibrary page and scroll down to Britannica Library. You will need your library card number to log in, then you can search for information.

You can't see a new moon because it's covered in shadow.
