

# Handprint Cactus Card

## What you need:

- A4 paper
- Drawing materials

## What to do:

1. Fold the paper in half to make a card.
2. Trace around your hand in the middle of the folded paper. This will make the cactus plant.
3. Add a pot below your cactus hand.
4. Colour your cactus in. You could add spikes or flowers.
5. Write a nice message to your mum or someone special inside the card.
6. You could trace all your family members hands to make many cactus plants.

What other art ideas can you make with handprints?
