

PIPE CLEANER SPIDER

What you need:

- Pipe cleaners. I used 8 for the legs and 4 for the body
- Paper
- Texta, pencil or pen
- Scissors
- Glue or tape

What to do:

1. Make the legs. I twisted two different colours together. I made 4 legs for the spider.
2. Hold all the legs together and tie them in a knot in the middle.
3. Using more pipe cleaners, wrap them around the knot you tied with the legs to make a body. I used 4 pipe cleaners. If you want your spider to have a larger body, wrap more pipe cleaners around the middle.
4. Draw some eyes on paper. Cut out and stick to the pipe cleaner spider.
5. Move and bend the legs to make the spider stand up.
