

# Beaded Snowflake

## What you need:

- Pipe cleaners (I used three).
- Beads with a large hole.

## What to do:

1. Twist two pipe cleaners together in the middle to make a cross. Add in more pipe cleaners depending on how many arms you want your snowflake to have.
2. Thread the beads onto each arm of the pipe cleaner.
3. When you have finished threading the beads on, twist the end and fold it over itself so the beads don't fall off.
