

Fluffy Cloud Paint

What you need:

- Food dye
- Shaving cream
- PVA glue
- Paper
- Paint brushes
- Plastic cups

What to do:

1. Protect your work surface with old newspaper. This activity will get messy! Mix equal part PVA glue and shaving cream. Add in a few drops of food dye and mix. If you want a light colour, only use a little bit of food dye. If you want a darker colour, use more. What colours can you make by mixing more than one colour of food dye together?
2. Paint a design onto paper using the fluffy paint you just made. This paint is very thick so when you are finished leave your painting somewhere to dry for a couple of days.
