# Rorschach Monsters

What you need:

- Plain A4 paper
- Coloured paper
- Paint
- Googly eyes
- Glue

What to do:

- Fold your paper in half, making a crease down the middle.
- Unfold the paper again and add one or more blobs of paint. A little goes a long way!
- Carefully refold the paper and use your fingers to spread the paint between the layers.
  This is where you can experiment a little!
  Try using your fingertips, rather than a flat hand, and gently drag the paint in different directions.
  Try using multiple colours on one sheet.
- Open your paper to see what kind of monster you've created!
- Add some glue on your googly eyes and stick them down.
- Once the paint is dry, cut around your monster and stick it on coloured paper.
