

SLIME MAKING

What you need:

- 1 cup PVA glue
- 1-2 drops food colouring
- 2-3 tablespoons baking soda
- 3-5 tablespoons contact lens solution * Must contain BORIC ACID
- Glitter (optional)

What to do:

- Pour glue into a medium bowl.
- Add food colour and mix well.
- Add Glitter (optional) and mix well.
- Add 1 tablespoon of baking soda and 2 tablespoons of contact lens solution at a time and mix slowly, the mixture should become harder to mix.
- Continue to add the baking soda and contact lens solution until a ball of slime forms.
- Pick up the slime and roll in your hands until smooth. If the slime is too wet, add another 1/2 tablespoon of contact lens solution and 1/2 tablespoon of baking soda and mix well.
