

# PAPER MOSAIC PIXEL ART

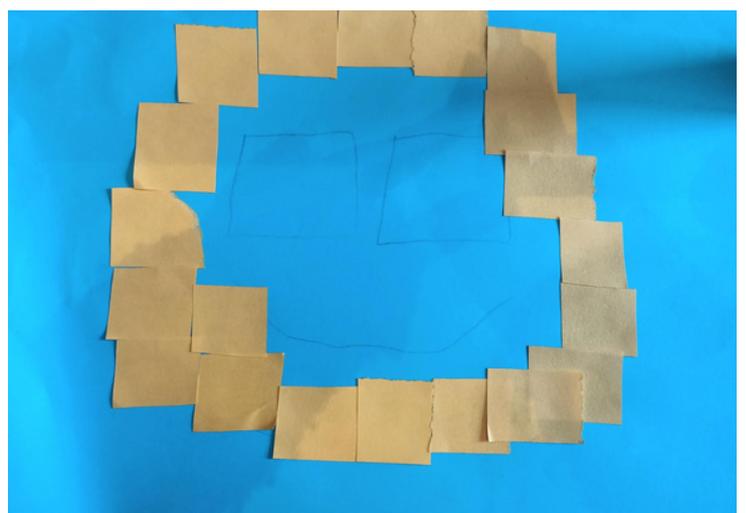

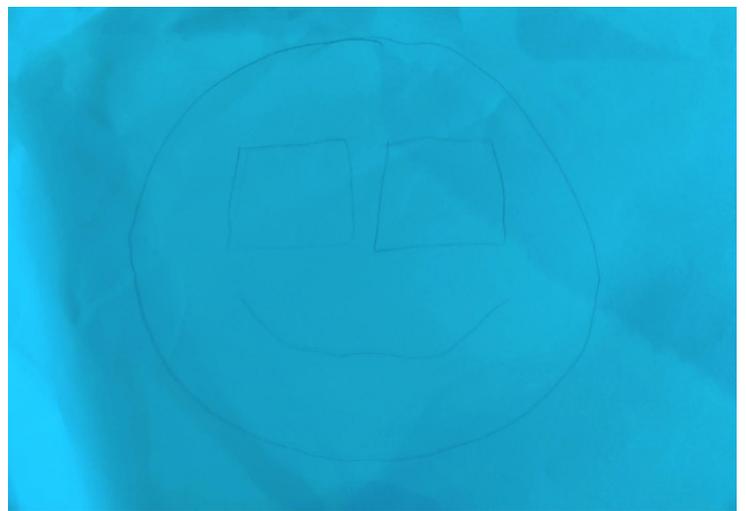

Pixel art is a digital art style where images are made using small squares. Let's try creating some pixel art paper mosaics!

## What you need:

- Colour paper, cut into small squares
- Paper
- Scissors
- Glue
- Pencils

## What to do:

1. Cut up the coloured paper into squares of roughly the same size.
2. Use another piece of paper as your background. Sketch out your image and lay the paper mosaics down until you are happy with how they look. Then you can start gluing them.
