

# Minecraft Pixel Art

Have you had a close look at Minecraft? Images are made up of blocks.

Lots of blocks.

In different colours.

Blocks are essentially pixels.

A pixel is one of the small dots or squares that make up an image on a computer screen.

The more pixels there are, the more the image looks real or accurate.

When you replicate images from Minecraft, you are essentially drawing lots and lots of squares or blocks.

Can you recreate your favourite images from Minecraft? Use the grid on the next page and lots of colour, to create your own Minecraft art.

You might like to share your creation with the [Kids Club Online Gallery](#).

Print this page and colour in the squares on the grid to create your Minecraft image.

Or draw your own grid of squares and then draw your design.
