

# SCRATCH ART

## What you need:

- Paper, thick paper or cardboard is better so it doesn't rip
- Textas
- Black crayon or oil pastel
- Skewer or something similar

## What to do:

1. Colour in the paper in a rainbow of colours so there is no white left.
2. Cover all the paper in black crayon. Press hard and colour so you can hardly see the colours anymore.
3. Using the skewer, scratch the black away to draw your design. When you scratch the black waxy crayon away, you can see the colours underneath.
4. What design did you come up with? Show us on the [Kids Gallery!](#)
