

FIZZY PUMPKINS

What you need:

- 1/2 Cup bicarb Soda
- 5 Drops orange food colouring
- Large bowl
- Wooden spoon or spatula
- 2-3 Tablespoons water
- Vinegar
- Pipe cleaner
- Bowl
- Dish Soap
- Gloves (Optional)
- Small toys (Optional)

What to do:

- In a large mixing bowl, pour in the bicarb soda, and the food colouring and mix well.
- Slowly add your water and mix, using your hands, roll into balls and place in your other smaller bowl.
- ***You can use gloves so it doesn't stain your hands**
- You can hide small toys in the middle of them to create an extra surprise.
- Cut your pipe cleaners into 5cm length pieces, and twirl to look like a pumpkin stem, stick your stems into the top of your balls.
- Leave them to dry for a few hours.
- Once dry, sprinkle a small amount of dish soap around your pumpkins and pour in the vinegar. Watch them fizz!
