

# MOVING EYES MUMMY

## What you need:

- Paper plate
- Paper
- Glue/sticky tape
- Scissors
- Pencils/textas
- Ruler

## What to do:

1. Colour in the paper plate. Draw eyes and carefully cut them out.
2. Cut two pieces of A4 paper into strips to make the bandages. I used a ruler and ripped the paper so the bandages have rough edges.
3. Glue the paper bandages all over the mummy.
4. On another piece of paper, draw some spooky eyes. Make sure they are the same size as the eye holes you cut out in step 1. Cut these out and stick them onto a wide strip of paper.
5. On the back of the paper plate, glue down the edges of two strips of paper. Thread the strip of paper with the eyes through these. Turn the plate around and move the paper and the eyes will move!
6. Show us a picture of your spooky mummy on the [Kids Club Online Gallery](#).
