

Christmas Advent Calendar

What you need:

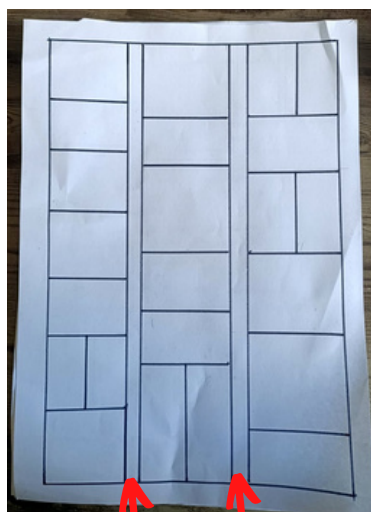

- 2 pieces of paper
- Pencils/textas
- Glue
- Scissors
- Craft knife
- Ruler

What to do:

1. Draw a Christmas themed design on paper.
This will be the design you will see when you open up the advent doors.

2. On the other piece of paper, draw a border around the edge. Now you need to draw the advent windows. The amount will depend on your advent count down. I drew 24, so I open the first window on the 1st of December and the last window on Christmas Eve. You could draw a weeks worth, or two weeks. I divided my page into three columns. Make sure you leave a border around each column so the windows open up ok. Add in numbers.

4	19	9	3
10	11	14	
17	5	2	8
21	18	24	
23	1		
6	13	20	22
15	12	16	7

Border

3. Colour everything in. Now you need to cut each window so it opens. If you have a craft knife it makes this step a lot easier. If not, carefully cut three sides of each window so they all open.

4. Turn the paper over and glue along the borders around the outside, and the ones in the middle. Stick this onto the design you drew in Step 1. Now every day leading up to Christmas you open the door with the date on it!
