

Mermaid Silhouette

What you need:

- Paper
- Pencil
- Stanley knife and cutting board.

What to do:

1. Draw a mermaid on paper or print out the image on the next page. Lightly colour in the section you are going to cut out, making sure you leave enough of an outline so the paper doesn't rip. A silhouette is a dark shape and outline of a subject. Usually the silhouette is black against a white background.
2. Using a stanley knife and a cutting mat, carefully cut out the areas you coloured in. You may need an adult's help with this.
3. When you are finished cutting, you can hang your mermaid near a window so the sun shines through, or stick it on darker paper so the silhouette stands out.
