

# Paper Ball Garland

## What you need:

- Coloured paper
- Glue
- Scissors
- Ruler
- String
- Pencils

## What to do:

- Create paper strips, using A4 paper and your ruler. Make each strip the length of the paper and half the ruler width wide.
- You need 4 strips per ball.
- Start by laying one strip of paper down and putting some glue in the centre, add another strip over the top to make a cross shape.
- Add more glue to the centre and add another strip over the top at a diagonal angle. This will leave only 1 space left for another strip.
- Add more glue to the centre and add your last strip.
- Add glue to the tip of the first strip you placed down and stick the tip of the opposite side on top if it, while holding it, add more glue and continue to stick the other ends of the strips to the top. This will create your ball.
- Create as many balls you as you like.
- Once you have enough, start threading them on a long piece of string.
