

Paper Christmas Trees

What you need:

- A4 Paper
- Square origami paper
- Scissors
- Glue
- Pom poms
- Pencils

What to do:

- Fold your square in half so it makes a large triangle
- Cut slices from the unfolded edge towards folded edge, be careful not to go all the way to the other edge.
- Unfold your triangle, it should now have feather-like bits, start folding each length towards the centre fold.
- Once they are all folded in, fold up the bottom of your tree.
- Carefully put glue on your folded side and glue it down on another piece of paper. You can fold your A4 paper in half to create a card or you can stick your tree down and draw around it.
- Stick your pom poms on the tree to create baubles, you can also draw on other decorations.
- If you are creating a card, write Merry Christmas underneath and fill in the inside.
- If you are creating a scene, draw some presents under your tree, maybe a whole lounge room, use your imagination, be as creative as you like.
