

SPIN DRUM

What you need:

- Cardboard
- Paper straw or wooden skewer
- Paper
- Pencils or textas
- Tape
- Glue
- Scissors
- String
- Beads

What to do:

- Draw a circle on your cardboard and cut it out.
- Draw the same size circle x2 on a piece of paper and cut them out.
- Colour in your paper circles with any design you like.
- Poke 2 holes in either side of your cardboard circle, where the red spots are in the image.
- Cut 2 lengths of string, on one end, thread on beads and either tie a knot or stick some tape around it so the beads don't fall off.
- Thread the empty end of the string through the holes on your cardboard circle and tie a knot.
- Stick your straw or skewer to the bottom of your circle, you should have your 2 strings dangling down the sides.
- Glue your coloured paper circles on top of your cardboard.
- Holding the straw/skewer, spin the drum back and forth. The beads will hit the drum and make a noise.
