

# Finger Cartoon Art

Take a photo of your fingers and/or thumbs.

This photo can be the basis of some cartoon art.

You can upload the picture to some drawing software and work on it there, or print out the photo and draw on it with a fine line texta or pen.

What can you draw?

Use your fingers or thumb to be the body and face of a character. You can add facial features, expressions, arms and legs. You might like to add additional cartoon items to your image to help tell a story.

The image here has two fingers, holding hands under an umbrella in the rain.

Use the pictures below to inspire your cartoon art.

You might like to share your cartoon photos to the [Kids Holiday Activities photo gallery](#).
