

MAKE AN ICECREAM SODA

There's nothing more refreshing than an ice-cream soda on a hot day.

Why not try making one for yourself?

You can try different flavour options of ice-cream and fizzy soda in your creation. You might like lime soda and chocolate ice-cream. Or vanilla ice-cream and cola. The choice is up to you.

I like strawberry ice-cream and lemonade.

Equipment:

Tall glass, ice-cream scoop or spoon, paper straw

Ingredients:

Ice-cream, fizzy soda drink

Method:

Place two scoops of ice-cream into a tall glass. Pour fizzy soda into the glass. The soda will react with the ice-cream and make it all frothy. You will need to determine how much fizzy soda to pour into your glass so it doesn't spill over.

Eat and enjoy!
