

Pencil Eraser Dandelion

What you need:

- Paper
- Paint
- Pencil with an eraser
- Pencils or textas

What to do:

- Draw a large line with a circle on the top, this will be your stem and centre of the dandelion.
- Draw small lines from the circle out, each line can be a different length, they don't have to match.
- Dip your eraser end of your pencil into paint and start dotting your paint around your small lines to create the flower end of the dandelion.
- If you want to add grass around it, dip your eraser into paint again and start dotting from the bottom of your page up.
