

Recycled Can Pen Holder

What you need:

- Clean, dry food cans with labels removed.
- PVA glue
- Scissors
- Something to decorate the can with. I used macrame cord for one, and washi tape for the other. You can get these from most places that sell craft supplies.

What to do:

- To make the cord covered can, paint PVA glue onto the can and wind the cord around the can, adding more glue as you go. When you reach the end, glue the cord inside the can. Leave to dry.

- What else can you use to decorate cans with? You can use washi tape, you can paint the can, cover the can with paper or ribbon. The possibilities are endless! Along with cans, you can also decorate jars. These make good vases.
