

ORIGAMI TIGER

What you need:

- Square paper
- Pencil/textas

What to do:

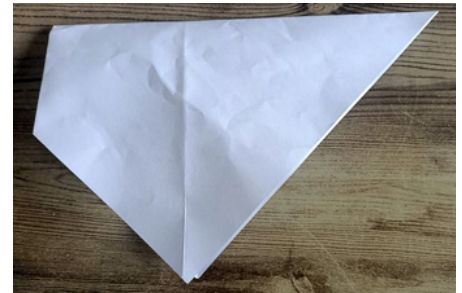

1. Fold the paper in half to make a triangle. Unfold and fold again in the other direction so you have a cross on the paper like the image below.

2. Fold the left corner to the middle crease line.

3. Fold the top corner down to meet the bottom corner.

4. Fold the bottom corner up so the point sits half way along the crease. Repeat for the other side.

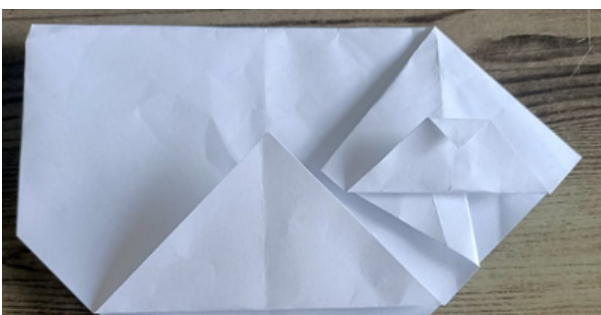

5. Fold the right corner into the middle crease.

6. Squash-fold the fold you made in step 5. Place your finger inside the triangle shape and move it around and flatten it out so it becomes a diamond.

7. Fold the bottom half of the diamond up to make the mouth of the tiger. Then fold the tip down a little. You have finished folding your tiger! Colour the tiger in and add stripes.
