

Photos with Friends

Hanging out with friends can be great fun. If you have a camera or a camera phone, you can take photos with your friends. You might be doing an activity, celebrating an event or just hanging out together.

Things to do with your friend photos:

- Print them out and create a friend photo album.
- Make your own photo frame and put the picture in the frame.
- Print your image and put in a cardboard frame to make it look like a polaroid picture.
- Print your photo on transfer paper and iron the image onto a t-shirt. Make one for you and one for your friend.
- Use your image and make a Bestie card for your friend.
- Remember to ask your friend if you can use the photo before you start any activity.
