

# THE KRAKEN!

## What you need:

- Paper plate
- Paper
- Something to weave with, wool/string/ribbon
- Hole punch
- Pencils/textas
- Scissors

## What to do:

1. Colour in the paper plate. I used light blue for the sky, and dark blue for the ocean.
2. Use a hole punch to punch holes around the bottom edge of the plate.
3. To make the ocean, cut a long piece of wool (or whatever you are using to weave with) and tie a knot in the top hole. Thread the wool through each hole, going across the plate. I went back and forth a few times so the ocean is thick.
4. Draw the kraken on paper. Colour in and cut out. Place the kraken in the waves and move it about in the ocean!
5. What other monsters of the deep can you make?
