

Tissue Box Viking Ship!

What you need:

- Tissue box
- Coloured paper
- Pencils/textas
- Scissors
- Glue and sticky tape

What to do:

1. Cut the top off the tissue box. Cover the tissue box in paper. I used brown paper and drew black lines so it looks like the ship is made from wood.

2. To make the sail, roll up some paper and stick together to make a thin tube. This will be the mast. Colour in a piece of paper to make the sail. Punch or cut two holes near the top and bottom and thread the mast through. Stick the mast to the inside of the boat.

3. To make the oars, roll up two pieces of paper like you did with the mast. Now punch or cut holes into the ship so you can push the oars through.

4. To make the paddle for the end of the oar, cut four rectangles of paper, fold each in half and stick these to the ends of the oars.

5. Your ship is finished! Have a look at the Paper Roll Viking to make one for your ship! Show us a photo on the [Kids Club Online Gallery!](#)
