

Handprint

ELEPHANT

What you need:

- Paper
- Paint
- Paintbrush
- Pencils/ Texters
- Hands

What to do:

- Paint your hand with any colour paint you like, and press your hand down on a piece of A4 paper. Your handprint will become your elephant.
- Once your hand print is dry, draw some lines on your thumb to create a trunk. Your fingers will be the elephants legs.
- Draw on a tail and some ears.
- Draw some scenery around your elephant. You can even make more handprints if you want to make more elephants. Use an adults hand if you want to create larger elephants.
