

Origami Elephant

What to do:

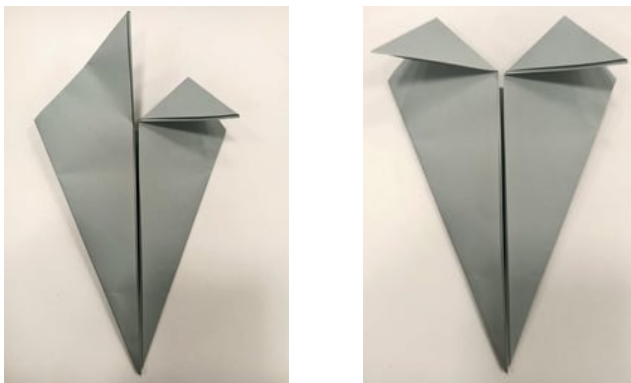

1. You will need a square piece of paper. Start by folding it in half to make a triangle.

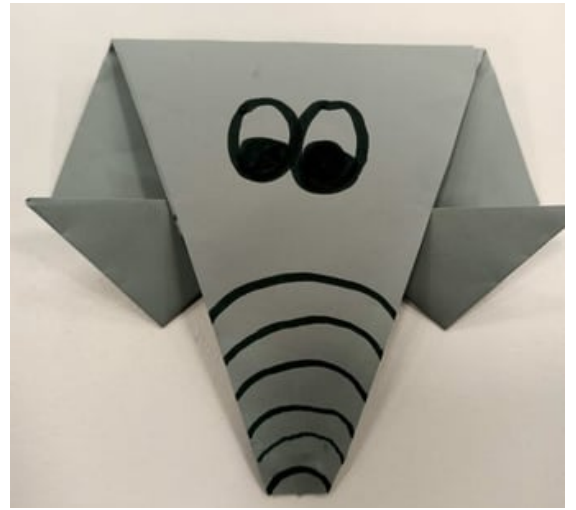

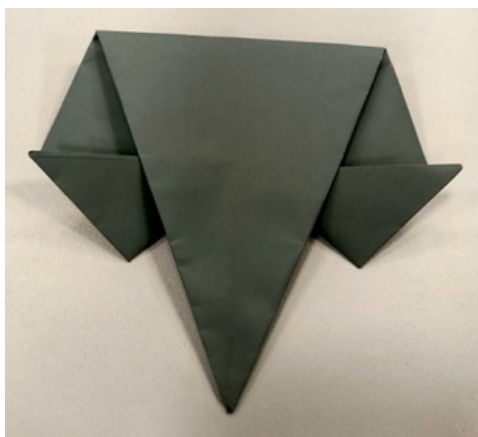

2. Fold the triangle in half again, then unfold you have a crease in the middle. Position the triangle with the long side facing up and fold one edge along the crease you just made. Repeat with the other side to make a kite shape.

3. Fold the two top corners down to make little triangles, like in the picture.

4. Fold the piece in half so it looks the elephant shape in the picture. Draw on details like a face and you are finished!
