

# ***SUPERHEROES JUMPING OVER BUILDINGS***

Can you leap over tall buildings in a single bound?

Line up some cardboard boxes and decorate them to look like buildings. Use markers or paint to create windows and doors. You do not need to use big boxes, a stack of small boxes will make a great building too.

If you don't have boxes, you can draw buildings on cardboard and stand them up.

Get into your superhero costume and see if you can leap or jump over the cardboard buildings.

How high can you jump?

How many buildings can you jump over at once?

Can you get someone to photograph you mid jump?

Try and make it look like you are flying.

Be safe at all times and do not try anything too risky.

Find a suitable background sheet and lay it on the ground. Lie on the sheet and position yourself to make it look like you are flying. Get someone else to stand over you and take the photo. Decorate the sheet with clouds and buildings to make it look like you are flying.

You may like to share your creation on the [Kids Club Online Gallery](#).
